# Ensuring COFFIS engagement before, during, and after Santa Marta: Key asks for COFFIS countries

COFFIS countries should collectively announce in Santa Marta:

- A commitment to phase out as soon as possible subsidies for fossil fuel exploration and production.
- A pledge to introduce no new fossil fuel subsidies.

COFFIS countries should:

- Announce participation in the conference at ministerial level.
- For the countries that have not released a fossil fuel subsidy inventory yet and not communicated a release date, announce a release date.
- For the countries that have not submitted an updated inventory since their first one in 2024, announce a release date for the next one.
- For the countries that are due to release a phase-out plan, announce a release date.
- For EU countries, ensure coordination, also with the European Commission.

See the **Annex** for a full overview and country-specific asks.

The Dutch chair, with the support of other EU COFFIS members, should, after the conference:

- Call for the ENVI Council (25 June 2026) to have conclusions referring to the outcomes of the Santa Marta conference.
- Call for the ECOFIN Council (5 May 2026) to have conclusions referring to the outcomes of the Santa Marta conference, including discussions on fossil fuel subsidy reform.
